## REMARKS

### A. Amendments to the Specification

To facilitate claiming priority, Applicants have amended the written specification. No new matter has been introduced by the amendments.

It is believed that the Preliminary Amendment filed on July 10, 2003, did not distinctly claim a priority date. Therefore, the above amendment reflects changes in the specification located in the Preliminary Amendment filed on July 10, 2003. It is believed that confusion might arrive concerning which application the present application is claiming priority from and which application the present application is a divisional of. To that end, a second preliminary amendment is filed herewith to distinctly claim priority to U.S. Provisional Patent Application No. 60/162,392 and also to distinctly state that the present application is a divisional of U.S. Patent Application No. 09/698,317. Applicants believe this will help facilitate the assigning of a priority date of the present application.

Applicant respectfully requests reconsideration of the priority date in view of the remarks made herein. A notice of allowance is earnestly solicited.
